Daniel Acco Maroni

Mid-Level Fullstack Engineer

👤 Profile

I am a developer with over 3 years of experience, possessing deep knowledge in web development. I have a strong affinity for PHP in web development and Flutter for cross-platform development. Throughout my career, I prioritize clean code and best practices, ensuring code quality and maintainability. I have a stronger inclination towards backend development, although I also have significant experience with frontend from my past projects. I have worked on various projects and API integrations, including integrating chat systems with WhatsApp and financial API integrations with banks. I have academic knowledge in C++, Java, and React, although I have yet to gain professional experience with these specific technologies.

💼 Employment History

Systems Analyst at Objetiva Software, Marau

June 2020 — January 2024

I worked on the development of multiple websites, applications, and systems focused on the real estate sector. I was involved in both project creation and the development of the Backend and Frontend of the applications, as well as deploying apps to the iOS and Android stores.

🎓 Education

Computer Science, Universidade de Passo Fundo, Passo Fundo

February 2018 — January 2024

Bachelor - Graduated
